New Data Fields for ES/EX/SL/ST Positions

To enhance reporting efforts for the Senior Executive Service and certain other executive level allocations within DOD, two new fields in DCPDS will be included in Patch 51.6 that is scheduled for Final Release Sunday, December 07, 2003 at 9:00 A.M. CST.

The new position data field is called the **Executive Allocation Source** and can be found under **Position > Extra Information > Multiple Agency Information**. When building positions and this field is not filled in, the user will receive an edit that reads "If pay plan equals ES, SL, or ST, Executive Allocation Source must be input." The user will need to input the information into this field. The codes that are available are:

Executive Allocation Source	Description
DA	Army
DN	Navy
DF	Air Force
OS	OSD/WHS (Washington Headquarters Service
DS	Other Defense Agencies
XD	Executive Development (XD)
PR	P&R Pool
SD	SecDef Pool
OT	OPM Temp

The new date field is called **Dt Initial Appt to ES/EX/SL/ST** and can be found under **Person > Extra Information > Other Person Information**.   When processing personnel actions that involve pay plans ES, EX, SL, or ST in the "TO" side of the Request for Personnel Action, and this data field is not filled in, the user will receive an edit that reads " When pay plan equals ES, EX, SL, or ST, Dt Initial Appt to ES/EX/SL/ST cannot be null." The user will need to input the information into this field.

A file has been uploaded to fill in values into these fields for the components. Both fields are "user updateable" which means if change is needed, these fields can be updated at any time and without a Request for Personnel Action.
